Subject: Terminal 4 Parking Garage Lighting Upgrade

Please Note –

Terminal 4 Garage Lighting Upgrade will begin the week of April 8, 2019 to facilitate the removal, and replacement of approximately 3,000 fixtures to upgrade the garage complex to LED lighting. Construction is expected to take 6 months, and scheduled to be complete prior to November 2019.

Work will begin on level 9 (roof level) and will continue down through each level of the garage. The project has been phased in order to maintain a drive lane and an exit at all times. Sections of parking will be closed for construction. “No Parking” signs will be placed in advance at parking stalls to capture parking areas for these closures. Warning signs will be placed within the garage entrance plaza detailing which level the project is actively performing upgrades on. Signs will also be placed throughout the garage directing users to available parking during restrictions.

Please watch for updated notifications regarding this work and thank you for your patience.

Thank you,
Joshua Johnson
